PROFESSIONAL SUMMARY

Results-driven Frontend Software Engineer with 4+ years of experience building scalable, high-performance web and mobile applications across the React and **MERN** ecosystems. Specialized in React.js, React Native, Next.js, and TypeScript, with strong command of responsive UI development, RESTful API integration, server-side rendering (SSR), and performance optimization. Proven track record of leading end-to-end feature delivery, mentoring junior developers, and collaborating within Agile/Scrum teams to ship user-centric, production-grade solutions.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, React Native, Next.js, Redux, Redux Toolkit (RTK), RTK Query, Context API

UI & Styling: Tailwind CSS, NativeWind, Material UI (MUI), Ant Design, Bootstrap

Backend: Node.js, Nest.js, REST APIs, Supabase

Databases: MongoDB (Studio 3T)

Testing: Jest, React Testing Library (RTL), Supertest, Unit & Integration Testing

Cloud & DevOps: AWS, CI/CD, Git, GitHub, GitLab, Bitbucket

Practices & Tools: Agile/Scrum, JIRA, SSR, SEO Optimization, Responsive Design, Vite, npm, yarn, Postman, Figma

Leadership: Team Mentorship, Code Review, Technical Guidance, Intern Team Leadership

PROFESSIONAL EXPERIENCE

Sekel Technologies — Pune, India

Senior Frontend Developer Mar 2025 – Present

Key Products: *Sekel Tech Omni-commerce Platform, Hyperlocal Dashboard, Sellr Mobile App*

Technologies: *Next.js, React.js, React Native, TypeScript, Tailwind CSS, NativeWind, Material UI, REST APIs, AWS, Git, Bitbucket, JIRA*

- Led end-to-end development and enhancement of enterprise-grade hyperlocal and omni-commerce SaaS products, owning architecture, feature design, implementation, deployment, and maintenance.
- Designed and developed scalable, reusable, and responsive user interfaces across web and mobile using Next.js, React.js, React Native, TypeScript, Tailwind CSS, NativeWind, and Material UI.
- Implemented server-side rendering (SSR), code splitting, lazy loading, and SEO best practices, improving page load performance and search visibility.
- Developed and integrated RESTful APIs and managed application state with Redux and Context API to enable seamless frontend–backend communication.
- Built core business modules including Store, Product, Order, Lead, Campaign, Review, SEO Management, and Analytics dashboards.
- Integrated native mobile features such as QR/Barcode scanning, camera, maps, file upload, local notifications, and AsyncStorage for the cross-platform Sellr app (Android & iOS).
- Optimized application performance using memoization and efficient state management to reduce redundant re-renders and API calls.
- Conducted code reviews, enforced coding standards, and diagnosed and resolved production issues to ensure platform stability and reliability.
- Mentored junior engineers and led internship teams through technical guidance, knowledge-sharing sessions, and deliverable reviews.

- Collaborated with product managers, UI/UX designers, QA, and backend teams within Agile/Scrum sprints using JIRA; supported Google Play Store and Apple App Store releases.

Praeclarum Tech Pvt. Ltd — Ahmedabad, India

Software Engineer Oct 2023 – Jan 2025

Project: *Finti — fintech web app enabling a single application submission to be reviewed by multiple financial providers in seconds*

Technologies: *React.js, TypeScript, RTK Query, Ant Design, Tailwind CSS, Sass, Nest.js, MongoDB, AWS, CI/CD, GitHub, JIRA*

- Led full-cycle development and maintenance of the Finti platform from the ground up.
- Implemented end-to-end features spanning UI/UX, server-side logic, and RESTful API integration.
- Conducted code reviews to ensure quality, performance, and maintainability while mentoring junior developers and leading the intern team.

Futurism Technologies Pvt. Ltd — Pune, India

Software Developer Apr 2022 – Sep 2023

Projects: *TreasureCode.X, Form Builder, Movez*

Technologies: *React.js, Redux, Node.js, MongoDB, Bootstrap, Jest, Supertest, Git, GitLab, Supabase*

- Developed and maintained scalable, user-friendly web applications with a focus on performance optimization, code quality, and secure integrations, including TreasureCode.X (ML image uploads, CRUD symbol management, role/permission handling, community forum, and real-time updates).
- Built a dynamic Form Builder that integrated JSON endpoints to load and save generated forms, delivering responsive UI and reliable API integration.
- Performed unit and integration testing with Jest and Supertest across projects, including the Movez event-ticketing app, ensuring reliable deployments through debugging, bug fixing, and code refactoring.
- Collaborated with cross-functional teams, conducted thorough testing, and mentored junior developers to deliver user-centric solutions.

KEY ACHIEVEMENTS

- Led end-to-end development of enterprise SaaS web and mobile applications
- Optimized application performance using SSR, lazy loading, and code splitting
- Delivered multiple enterprise business modules across web and mobile platforms
- Improved API efficiency by optimizing state management and reducing redundant requests.
- Mentored junior developers and internship teams while enforcing coding standards
- Received repeated client appreciation for delivering high-quality web applications on schedule.

EDUCATION

Bachelor of Engineering (BE) — Shivaji University, Kolhapur 2020
